UML - гpaфaмa

Class: car

атpибyты:

- coordinates: Coordinates
- firm: string
- model: string
- driver: Driver
- type: string

Class: mine operator

атpибyты:

- name: string
- location: string
- list_cars: list[Car]

Метoды:

- repair-car (Car)
- add-driver (Car)
- finish-car (Car)

Class: small-Truck (Car)

атpибyты:

- capacity: float

Метoды:

- start-transportation()
- finish-transportation()

Class Company-car (Car)

атpибyты:

Метoды:

- start-run()
- finish-run()

Class medium-Truck (Car)

атpибyты:

- capacity: float

Метoды:

- start-transportation()
- finish-transportation()

Class Driver

атpибyты:

- id: int
- name: string
- surname: string
- car: Car
- status: bool
- radio: int

Метoды:

- start-work()
- end-work()

Class Big-Truck (Car)

атpибyты:

- capacity: float

Метoды:

- start-transportation()
- finish-transportation()

Class Special-Truck (Car)

атpибyты:

- capacity: float
- cargo: string

Метoды:

- start-transportation()
- finish-transportation()

Class Coordinates

атpибyты:

- x: float
 - y: float
- Метoды:
